UNSW Business School

Bachelor of Information Systems

Information systems shape the technology that fuels the economy. Learn to innovate with skills, knowledge and experience in information technology solutions for business from the Bachelor of Information Systems.

Key features

Learn to innovate.
Our students learn to initiate, design, implement and use IS with the intention of changing the status quo. We want you to solve problems, enrich relationships, optimize exchange, enable human potential, and make the future better than the present with innovative digital business solutions.

Gain practical skills and accreditation.
BIS is accredited by the Australian Computer Society (ACS) at the Professional Level, preparing you for professional practice in information and communication technology (ICT).

Build your expertise.
Our flexible and engaging program allows you to choose a specialist elective stream in IS in Data Analytics, IS in Programming, and IS in Organisations, or a generalist stream with your choice of any prescribed IS electives.

Make global industry connections.
Students can participate in an international information systems and technology practicum, to develop a practical understanding of international aspects of IS/IT business operations.

Bachelor of Information Systems Admissions Scheme (BISAS) Complete a BISAS submission to demonstrate your passion for information systems and performance in relevant subjects. It is an easy online process, and can only ever boost your chances of admission. Visit unsw.to/portfolio for more information.

Business School students have access to our Career Accelerator, a suite of hands-on professional development experiences including internships, mentoring, global practicums, and networking and events.
